Richard Trillwood Richard Trillwood, founder and president of Electron Beam Engineering, Inc. (EBE), a state-of-the-art electron beam and laser beam welding company in Anaheim, is proud to announce that his company has earned the AS9100 and ISO 9001:2008 Quality Management System certifications, which add quality assurance

expectations for design, development and production work that apply to the aviation, space and defense sectors. The accomplishment is a milestone for Trillwood who designed the world's first compact production electron beam welding machine before founding EBE in 1991.
