

## PRESS RELEASE

**October 15<sup>th</sup>, 2018**

### **The Trillwood Family & Electron Beam Engineering Inc., Named Vocational Visions Donor of the Year**

The Trillwood Family and Electron Beam Engineering have been named Vocational Visions Donor of the Year and received this award at the annual fundraiser; “An Enchanted Evening, a Night at the Oscars” held at the Irvine Marriott on Sept 29, 2018.

Vocational Visions is a 501 (c) 3 nonprofit organization located in Mission Viejo, California. Vocational Visions enhances the community by developing the talents of adults with intellectual and developmental disabilities. Their licensed programs, services and personalized support plans provide meaningful day programs, facilitate community inclusion and secure employment opportunities for over 500 men and women.

“It is a joy to know that these resources can make a difference by providing Vocational Visions’ participants with an opportunity for social interaction and a sense of purpose through work and social events” said Hilary Hurt, Executive Sales Manager at Electron Beam Engineering. “We are proud to say that we have supported this organization for over 20 years.”

As owners of Electron Beam Engineering, the Trillwood and Hurt families have a personal connection with Vocational Visions as their family member Frances Trillwood, attends one of the licensed programs which, over the span of 20 years, has enhanced her quality of adult life, enabling her to make friends, develop daily skills and social inclusion. Hilary Hurt, who is the sister of Frances, is a volunteer and sits on the Vocational Visions Board as Vice Chairperson and followed in her father’s footsteps, Richard Trillwood, who was also a Vocational Visions Board Member and avid supporter, until he passed away in December 2016.

#### About Vocational Visions

Since 1974, Vocational Visions has provided vocational, economic and social services to Orange County adults with intellectual/developmental and other disabilities. The nonprofit organization has eight comprehensive programs that serve more than 500 men and women by providing pathways to employment, life-long learning, and community inclusion.

For more information about Vocational Visions, call 949.837.7280, ext. 214 or visit [www.vocationalvisions.org](http://www.vocationalvisions.org).

About Electron Beam Engineering, Inc.

Electron Beam Engineering provides precision electron beam welding and laser beam welding services, specializing in working with complex components for a variety of applications, including aerospace, medical, automotive, defense, communications, electronics, jewelry, oil and gas exploration, semi-conductors, sensors, transportation and commercial uses. EBE is known for its outstanding quality and fast turnaround, and its technical staff is always available for consultation. EBE provides design assistance for all customers regarding their products including, but not limited to, the use of laser beam and electron beam welding, joint design and material selection.
